PROFILE

Junior Web Developer with a DAW degree (2026) and hands-on experience in a real corporate environment at DataControl. Tech stack: HTML5, CSS3, JavaScript ES6, Java, SQL, and Git. Thanks to my strong previous background in photography, graphic design, microcomputer systems and networks, and project management, I bring a unique sensitivity to user experience (UI/UX) from day one. I am looking for a stable opportunity to join a technical team and continue growing in the industry.

EXPERIENCE

Fullstack Developer – Work Placement (FCT) | DataControl · Mar 2026 – Jun 2026 · Remote

- Developed modules in a real business environment following agile methodology (daily stand-ups, sprints, code reviews).
- Managed Git repositories as part of a team and maintained collaborative version control via GitHub.
- Designed, modelled and administered relational databases (MySQL).
- Integrated with LMS platforms (Moodle) and corporate tools (Jira, Trello, Microsoft Teams/SharePoint).
- Fast adaptation to new technologies (Dataflex) in a 100% remote working environment.

Photographer, Graphic Designer & Project Manager | Freelance · Oct 2010 – present

- Created visual identity assets (logos, posters) and professional photo retouching: strong command of composition and visual hierarchy directly applicable to Frontend design.
- Client acquisition, budget management and on-time project delivery: self-management skills and results-oriented mindset.

Operations Coordination & Customer Service | Sevilla FC · Konecta · Cirque du Soleil · Amazon PhotoStudio · Hospitality · 2016 – 2024

- Team leader at Cartuja Center (Seville European Film Festival): managed team tasks and audience flows at international-scale events.
 - Handled sensitive real-time data and corporate tools for data management (Spanish Tax Agency, Amazon).
 - Bilingual Communication (Spanish/English): Gained 3 years of experience living and working in London within fast-paced international environments. Proven cultural adaptability and teamwork across diverse sectors (Hospitality, London Amazon PhotoStudio, London KidZania/Picture Air).
-

PORTFOLIO — FEATURED PROJECTS

Personal Web Portfolio

- Bilingual site (ES/EN) with full responsive layout. Technologies: semantic HTML5, CSS3 (Flexbox, Grid, CSS variables), continuous deployment via GitHub Pages.

My Functional Photography Web Portfolio

DAW 2026 Final Project: Engineered a Fullstack architecture. Developed an interactive Frontend using React with a secure, private login area for clients, and built a Node.js/Express Backend to manage encrypted session authentication and media galleries. TECHNOLOGIES & TOOLS

Frontend: HTML5, CSS3, JavaScript ES6, React, Tailwind CSS, Responsive Design.

Backend: Node.js, Express, Java SE / Java EE, JDBC, REST API

Databases: MySQL, SQL.

Version control: Git, GitHub

Tools: VS Code, IntelliJ, Eclipse, FileZilla, VirtualBox

Project management: Jira, Trello, Agile methodologies (Scrum)

EDUCATION

Higher Degree in Web Application Development (DAW) | CESUR · Sep 2024 – Jun 2026

- Technical training in the complete web development lifecycle: user interface creation, frontend/backend logic programming, and application deployment.

Intermediate Degree in Microcomputer Systems and Networks (SMR) | IES Ciudad Jardín

Sep 2009 – Jun 2011

- Technical foundation in hardware, local network configuration, and operating system administration.

Java SE & Java EE Course | Píldoras Informáticas · Jun 2026 – present

- OOP, JDBC, sockets, multithreading with Threads. Applications using Java Standard and Enterprise Edition.

AI-Assisted Development Course | MoureDev · 2026

- Integration of AI tools into development workflows. Certificate awarded.
-

LANGUAGES & SKILLS

- **Spanish:** Native | **English:** Advanced (3 years of residence in London)
- Adaptability | Technical teamwork | Effective Communication | Proactivity | Growth mindset
